

Text Message Alerts

Bus-Scan® **ALERT**

Having our Bus-Scan® Child Reminders is a great way to help ensure the safety of kids on school buses. It's a familiar and proven way to sound the alarm when a seat check hasn't been performed properly.

Now there's a way to extend the reach of that alarm--to your smart phone! As good as a vehicle alarm is, it can be walked away from--ignored. It doesn't happen often, but when it does--you'll know. Immediately.

You'll know about other alarm conditions, too. You can have up to three other sensors* to report emergency states on the bus, including a Driver Panic button, as well as Motion and Door Intrusion alarms for after-hours monitoring.

When an alarm occurs, the Bus-Scan® ALERT will send a text message to your smart phone, with the nature of the alarm, and the GPS location of the vehicle. You can designate multiple recipients for the messages, set the vehicle ID and other configurations for the Bus-Scan® ALERT by just sending it a simple text message from your phone.

Call to find out more about this revolutionary way to add a measure of safety to Bus-Scan®. By the way, the Bus-Scan® ALERT will work with most other systems too, as an easy retro-fit.

* Additional alarms require optional devices. Please call for details and pricing.
